

MONARCH

Low Voltage 3-Phase Induction Motors | Range
0.55kW to 500kW

TECO 

AUSTRALIA & NEW ZEALAND

TOTALLY ENCLOSED FAN-COOLED CAST IRON FRAME SERIES

General Information

MONARCH GX - Three Phase Induction Motors are a range of high quality, Totally Enclosed Fan Cooled (TEFC), Squirrel Cage Induction motors, designed, manufactured and tested to the latest International and Australian Standards.

There are two main motor types -

Types	Enclosure Protection	Insulation Class	Shaft seals	Finish Colour
MONARCH	IP55	F	"V" ring	TEAL
MONARCH Severe Duty	IP66	H	Gamma	BLUE JADE

Electrical Design and Standards

Altitude

Designed for operation at an altitude up to 1000 metres above sea level (please refer to TECO sales offices for higher altitudes).

Ambient

Motors are designed to operate in ambient conditions of -20°C to +40°C as standard. Operation in adverse ambient conditions should be referred to TECO.

Direction of Rotation

Standard rotation is clockwise when viewed from the drive end with the terminal markings corresponding to incoming line markings.

Duty Rating

All motors have a maximum continuous duty rating of S1 to AS1359.101. Other duty ratings are available on request.

Electric Supply

Stock motors are designed for operation on a 380-415 Volt 3 phase 50 Hz supply and are also suitable for a 440-480 Volt 3 phase 60 Hz supply.

Motors 3 kW and below are 380 - 415 Volt 50 Hz STAR connected and may also be reconnected to 240 Volt 3 phase 50 Hz DELTA configuration for use with single phase input Variable Speed Drives.

Motors 4 kW and larger are 380 - 415 Volt 50 Hz DELTA connected.

Motors can be manufactured for supply systems of up to 1100 Volts, 50 or 60 Hz on a factory made to order basis or by local rewind / wind.

Motor Types / MEPS (Minimum Efficiency Performance Standard)

All motors meet or exceed the Minimum Efficiency level requirements of the Australian / New Zealand Standard "AS/NZS1359.5-2004" to Table B2 where applicable.

Performance

Motors are designed to meet the performance requirements of Design N as per AS1359.41, normal torque for Direct On Line starting.

Motors are also suitable for other means of starting, depending on load characteristics, please refer to TECO.

Motors can be manufactured to provide special performance characteristics to suit specific applications as required.

Standards

Motors are designed, manufactured and tested in accordance with AS1359, IEC60034, IEC60072 with Quality Assurance to ISO9001. Frame sizes are to AS1359.30 CENELEC HD231 allocations. However, there are some exceptions where motors are designed to meet the AS/BS frame allocations AS1359 as detailed in "Performance Data" on pages 5-7, and Dimensions on page 8.

Stator and Windings

High grade insulated cold rolled electro magnetic steel laminations.

Standard insulation is Class F insulation (155°C) with the Severe Duty model utilising full Class H materials (180°C).

Windings are designed with a maximum temperature rise of class B for long motor life and thermal reserve for abnormal conditions.

Windings are random wound double enamelled copper wire, impregnated with a solventless resin and all motors are tropicalised as standard.

Testing

In addition to a full program of tests during manufacture each motor is subjected to routine tests to AS1359 prior to despatch.

Two Speed Motors

Available ex stock are a variety of two-speed motors for variable torque applications (Centrifugal pump / Fan).

Pole configurations

Poles	2 / 4	4 / 8	4 / 6	6 / 8
Winding	Tapped	Tapped	Dual	Dual

Mandatory mounting and shaft dimensions are as per this catalogue, however overall Two Speed dimensions differ for 80 - 132 frames. Please refer TECO for outline drawings.

Stock motor connection diagrams

DUAL WOUND (Y/Y)

LOW SPEED (Y)
SUPPLY TO 1U, 1V, 1W

HIGH SPEED (Y)
SUPPLY TO 2U, 2V, 2W

TAPPED WOUND (Y/Y)

LOW SPEED (Y)
SUPPLY TO 1U, 1V, 1W

HIGHT SPEED (Y)
LINK 1U, 1V, 1W
SUPPLY TO 2U, 2V, 2W

Refer to page 7 for performance data, other output powers and performance data is on request.

Variable Speed Drive (VSD) suitability

Motors are suitable for VSD duty, subject to torque and speed limitations depending on the load characteristics and correct installation of motor and drive. EDM protection can be provided as a modification when requested.

Winding Protection

Single speed motors frame sizes D160 and larger are fitted with PTC thermistor protection (P140) within the windings, one per phase, connected in series with the leads terminated in the main terminal box.

Thermistors are an optional extra on all two speed motors.

Mechanical Design and Standards

Balance

All rotors are dynamically balanced with a half key to Class N or better, in accordance with AS1359.114.

Bearing and Lubrication System

Frame size	Poles	DE Bearing	NDE Bearing	Greasing
D80 ~ D160	All	Ball	Ball	Greased for life
D180 ~ D400	2	Ball	Ball	Grease relief
D180 ~ D225	4 and above	Ball	Ball	Grease relief
D250 ~ D355	4 and above	Roller (Ball)	Ball	Grease relief
D400	All	Ball (Roller)	Ball	Grease relief

Notes:

- (Items in the parentheses are alternatives).
- 2 Pole motors up to D180 are suitable for direct drive or belt drive.
- 2 Pole motors D200 and larger are suitable for direct drive, belt drive above D200 please refer to TECO.
- Stock motors 4 Pole and larger, up to and including D355 are suitable for direct drive or belt drive.
- D400 4 Pole and slower, please refer to TECO with drive details for correct bearing selection.
- Grease Relief system enables motor to be re-greased during operation.
- V-ring shaft seals are standard but metal backed Gamma seals are used on the Severe Duty models.

SEVERE DUTY BEARING ARRANGEMENT WITH GAMMA SEALS

Cooling System

- Cooling is Totally Enclosed Fan Cooled (TEFC), with integrally cast cooling fins on frame and is fitted with external fan (IC411) to AS1359.106.
- The cooling fans are bi-directional and low noise as standard (larger 2 pole may have uni-directional fans for low noise).

Finish

- All castings are mechanically cleaned and de-greased.
- Cast Iron components are primed internally and externally with an epoxy red oxide primer.
- Two finish coats of matt acrylic resin are applied providing a high corrosion protected surface. Finish colour TEAL T63 (standard), GLOSS BLUE JADE T24 (Severe Duty), colours are to AS2700.

Hardware

- All hardware is electro zinc plated for better corrosion resistance.
- Stainless steel hardware can be offered as an alternative, please contact TECO for the surcharge to provide this feature.

Mounting

- Motors are available in the following mountings -
- Foot mounted
- Foot and Flange mounted
- Flange mounted
- Foot and C Face mounted
- C Face mounted

Motor Construction

- Cast Iron frame with integrally cast feet and cast iron end shields.
- Castings are machined to close tolerances for accurate alignment and minimum vibration.
- External cooling fan is polypropylene and some larger size motors utilize metallic fans.
- Fan cover is pressed steel.

Rating Plate

- A stainless steel rating plate containing all details as specified in AS1359.4 including bearing sizes is fitted to all motors.

STANDARD BEARING ARRANGEMENT WITH V RING SEALS

Rotor Assembly

- High grade insulated cold rolled electro magnetic steel laminations.
- Rotor cage is pressure die cast high conductivity aluminium with waffer blades and balance supports integrally cast onto the rotor endrings.
- The rotor is pressed and keyed (on larger motors) to a high tensile steel shaft.

Smoke Spill

- Smoke Spill to AS1668.1:1998 is available on modified stock motors, direct driving axial fan, cooling IC418.
- Motor sizes available are D80 ~ D280, 4 pole and slower, single or multi-speed and have been tested in conjunction with TECO Variable Speed Drives to AS4429-1999 for either dual purpose or emergency use.

Time / temperature ratings

Rating	Time (minutes)	Temperature (°C)	Motor Insulation Class
1	120	200°C	F
2	30	300°C	H

Terminal Box

- Terminal box is top mounted on motor frame with all metal to metal joints provided with neoprene gaskets.

- Base – Lid surfaces are machined and fitted with one-piece neoprene gasket providing terminal boxes with an IP66 rating.
- Terminal box can be rotated in 90° steps through 360° for alternate cable entry orientations.

Options

- Some available options in this range are as follows:
- Airstream rated IC418
- Anti-condensation heaters
- Auxiliary terminal boxes for Thermistor / Heater / RTD terminations
- Cooling Tower application
- Double / non standard shaft extensions
- Electromechanical "fail safe" Brake Motors
- Encoder / Tacho
- Force cooling IC416
- Insulated bearing
- IP56, IP65 & IP66 enclosure
- Multi-speed motors, certain 2 speed motors are ex stock
- Resistance temperature detectors (RTD's) winding and / or bearing
- Rotor Groundary brush
- Smoke Spill
- Special paint systems / colours
- Stainless steel fasteners
- Thermistor protection (on motor frames <D160)
- Others on request

MONARCH GX - Severe Duty

- Notes:
1. Output at 415V also suitable for 380V and 400V operation. For 380V multiply full load current by 1.092. For 400V multiply full load current by 1.0375.
 2. Test Method: AS1359, Table 2, Method B.
 3. Tolerance: AS1359.101
 4. Mean Sound Pressure Level at no load and 1 metre.
 5. Frame sizes to AS1359.30 1997 Western European allocations from CENELEC HD231 apart from motors with suffix*** which are to AS1359.30 1997 Australia British allocations.

- Notes:
1. Dimensional data subject to change without notice.
 2. Lifting facilities provided on motors frame size D100 and larger.
 3. For tolerances see page 11.
 4. Bearing numbers in brackets apply to 2 pole motors.
 5. **AS1359 Australian/British frame allocations available for 110kw 2 pole, 75kw and 110kw 4 pole.
 6. Two speed motor mandatory mounting and shaft dimensions are as per this catalogue except for 80 - 132 frame . Refer Teco for two speed motor outline drawings.
 7. D = direct drive , B = belt drive.
 8. *** = Direct drive only , refer teco for belt drive dimensions.
